The Future of Luxury Asset Protection

The tech-first insurance platform crafted for luxury asset owners addressing the $13b gap in coverage

WONDERCARE

LUXURY INSURANCE

Insurance is failing owners of luxury assets

Problem: Homeowners policies treat high-value assets as generic 'personal property'

Result: Restricted sub-limits and depreciated payouts that ignore market reality

Typical insurance assigns static policies to dynamic assets.
They travel, they often appreciate, yet are treated as part of a stationary homeowners policy.

70% of luxury watch owners have either no insurance coverage for their timepieces or rely on restrictive homeowners' riders that fail during travel or market prices increases

WonderCare's market-value protection (up to 150%) is specifically designed for the luxury asset market where values can rise rather than just fall

WonderCare solves this

Standalone Policy

Watch claims on a homeowners rider can spike premiums or cancel coverage. WonderCare is standalone — your home insurance is never at risk.

Worldwide All-Risk Coverage

Instead of Named Perils, inside-the-home only, WonderCare covers theft, loss, accidental damage, and mysterious disappearance anywhere in the world.

Market-Value Protection (up to 150%)

Legacy policies pay depreciated Actual Cash Value. WonderCare pays full market value — with a 150% buffer for secondary market appreciation.

$0 Deductible

Homeowners policies carry $500–$5,000 out-of-pocket deductibles. WonderCare delivers true first-dollar protection.
